2D Shortest Path Game Report (How to use the application)

To use the program, download and extract the archive zip file using a tool like 7-Zip or WinRAR. Open the extracted folder in a reliable IDE (e.g., Visual Studio Code or Code::Blocks). We recommend Visual Studio Code. Open a terminal in Visual Studio Code and copy and paste the following command below in the terminal.

```
g++ -o Menu "C++ Files/Array.cpp" "C++ Files/MinHeap.cpp" "C++
Files/Graph.cpp" "C++ Files/Map.cpp" "C++ Files/Characters.cpp" "C++
Files/main.cpp" -I"HeaderFiles" -std=c++17
```

An exe file should be created in the Main folder. Click and run the generated Menu.exe in the main folder to start the application.
